## AT4CS LIGHT **ANTI-ARMOUR** WEAPON WITH CONFINED SPACE CAPABILITY

The development of AT4CS was dedicated to providing infantry soldiers with the means to use the unique and complex environment of the urban battlefield to their full advantage in defeating a mechanised enemy.

AT4CS combines the light weight and firepower characteristics of the AT4 systems with the ability to fire from confined spaces and other narrow firing positions. Where conventional light anti-tank weapons would force the gunner to leave cover for a more open and exposed firing position, the unique internal ballistic design of the AT4CS system allows for maximum use of the protection offered by the urban environment.

AT4CS HP is disposable and preloaded with a specially developed High Penetration (HP) warhead. This provides the soldier with a weapon capable of defeating armour thicknesses exceeding 500 mm, which is more than enough to defeat most types of armoured targets on the urban battlefield.

AT4CS RS is disposable and preloaded with a specially developed unique shape-charge warhead with outstanding behind armour effects inside the target and reduced sensitivity.

AT4 CS HP/RS STATUS  
WEAPON  
WARHEAD

**COMBAT PROVEN**  
**CONFINED SPACE CAPABILITY**  
**HIGH PENETRATION (HP)**  
**REDUCED SENSITIVITY (RS)**

# SAAB

### FORCE MULTIPLIER

- In AT4CS the dismounted infantry has a unique weapon to effectively dominate the canalizing environment with limited mounted manoeuvre space that characterises the urban battlefield.

### NEW THREAT DIRECTIONS

- The confined space capability of AT4CS vastly increases the possible number of firing positions available to the soldier.

### COMBAT PROVEN

- AT4CS is a combat-proven system currently in service with a number of armies worldwide.

AT4CS is a combat proven weapon.

AT4CS in jungle warfare.

AT4CS fired from confined space.

### TECHNICAL DATA CS HP

Calibre	84 mm
Weight	7,8 kg
Length	1,04 m
Muzzle velocity	222 m/s

### TRANSPORT BOX

L x W x H	1090 x 795 x 250 mm
Weight (4 pcs)	49 kg
Unit load (16 pcs)	210 kg

### PERFORMANCE

Armour penetration	> 500 mm
Effective range	> 300 m

ADR/RID IMDG/DGR 1.1E  
FN/UN: 0181

### TECHNICAL DATA CS RS

Calibre	84 mm
Weight	7,8 kg
Length	1,04 m
Muzzle velocity	222 m/s

### TRANSPORT BOX

L x W x H	1090 x 795 x 250 mm
Weight (4 pcs)	49 kg
Unit load (16 pcs)	210 kg

### PERFORMANCE

Armour penetration	> 400 mm
Effective range	> 300 m
Unique behind armour effects:	
- extensive spalling	
- intensive heat	
- high pressure	

ADR/RID IMDG/DGR 1.1E  
FN/UN: 0181
